MutT/mudix family protein - Deinococcus radiodurans (strain R1)

C,Species: Deinococcus radiodurans

C,Species: Deinococcus radiodurans

C,Baccies: Deinococcus radiodurans

C,Baccies: Deinococcus radiodurans

C,Baccies: Deinococcus radiodurans

C,Baccies: Deinococcus radiodurans

C,Accession: A7550

hypothetical protein TP0608 - syphilis spirochete
c; Species: Treponema pallidum subsp. pallidum (syphilis spirochete)
c; Species: Treponema pallidum subsp. pallidum (syphilis spirochete)
c; Date: 24-Jul-1998 #sequence_revision 24-Jul-1998 #text_change 09-Jul-2004
c; Accession: B71305
R; Fraser, C.M.; Norris, S.J.; Weinstock, G.M.; White, O.; Sutton, G.G.; Dodson, R.; Gwin rson, J.; Khalak, H.; Richardson, D.; Howell, J.K.; Chidambaram, M.; Utterback, T.; McDc revo, J.; Weidman, J.; Smith, H.O.; Venter, J.C.
Science 281, 375-388, 1998
A; Title: Complete genome sequence of Treponema pallidum, the syphilis spirochete.
A; Reference number: A71250; MUID:98332770; PMID:9665876

"The location of tyrosine-O-sulphate in fibrinopeptides.";
Acta Chem. Scand. 22:1339-1346(1968).
-!- FUNCTION: Fibrinogen has a double function: yielding monomers that polymerize into fibrin and acting as a cofactor in platelet
                                                                                                                                                                                                                                                                                                                                                                                                                                             SUBUNIT: Hexamer containing 2 sets of 3 nonidentical chains (alpha, beta and gamma), linked to each other by disulfide bonds. PTM: Conversion of fibrinogen to fibrin is triggered by thrombin, which cleaves fibrinopetides A and B from alpha and beta chains, and thus exposes the N-terminal polymerization sites responsible for the formation of the soft clot.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      SEQUENCE FROM N.A.
